Guidelines on Declaration of Interests

II. General Principles

Applicants for funding under the FIS are required to make a declaration of interests upon making an application. The purpose is to ensure good corporate governance in implementing the approved proposal (“the Proposal”).

2. The basic principle to be observed is that applicants should be disinterested and impartial and it is the responsibility of each applicant to judge and decide if the situation warrants a declaration. While it is impossible to define or describe all the situations that would call for such a declaration, generally speaking, a conflict of interest arises when the implementation of the Proposal could be affected by, compete or conflict with, a personal interest of the applicant or any persons acting on behalf of the applicant for the implementation of the Proposal (“implementation agents”).

3. When an applicant or implementation agent has a conflict of interests with any partner institute(s), speaker(s), person(s) and supplier(s) to be hired / appointed (“appointed persons”), he / she should make full disclosure of his / her interests. A conflict of interests review will be conducted by the Vetting Committee (“VC”) when assessing the application. In cases where the conflict can be eliminated or mitigated by abstaining / refraining an applicant or implementation agent from performing or getting involved in performing the work, the VC may impose certain restrictions on the involvement of the applicant or implementation agent in the activity.

III. Potential Conflict of Interests Situations

4. Some potential conflict of interests situations are set out below:

(a) Pecuniary interests held by an applicant / implementation agent or any close

relative of his / hers in relation to the appointed persons. Applicants / implementation agents are themselves the best judge of who, in the particular circumstance, is a “close relative”.

- (b) A directorship, partnership, advisory or client relationship, employment or other significant connection with the appointed persons (other than the proposed contractual relationship under the Proposal) which has a pecuniary interest in, or is the subject of, the Proposal.
- (c) Some friendships which might be so close as to warrant declaration in order to avoid situations where an objective observer might believe an applicant’s / implementation agent’s recommendation / decision in relation to the appointed persons to have been influenced by the closeness of the association.
- (d) Any interest likely to lead an objective observer to believe that the application might have been motivated by personal interest rather than a duty as an applicant / implementation agent.
